THETFORD

SPECIAL TOILET ADDITIVES AND TOILET PAPER

In order to ensure the effective functionality and optimum performance of the toilet system, Thetford offers special toilet paper and toilet additives. The toilet additives prevent unpleasant smells, suppress gas formation and keep the inside of the waste holding tank clean. They promote the decomposition of solids in the waste holding tank, preventing blockages when emptying. Aqua Soft makes its contribution too: this special toilet paper quickly dissolves in the waste holding tank. In addition, by discouraging sticking, Aqua Soft ensures that no defect or damage develops in the waste holding tank. The range of toilet additives available may vary for each country.

THETFORD SERVICE

Thetford service consists of intensive support through sales outlets, authorised service centres and the Thetford website, which you can always visit for expert advice about the whole range of Thetford products. Of course you are also welcome to contact us directly.

WHERE TO BUY?

Thetford products are available at all leading caravan and motorhome dealers, and at specialist camping stores.

For more information about our products, sales outlets or service centres we refer you to www.thetford-europe.com.

YOUR OWN TOILET - ANY TIME AND ANY PLACE

Are you looking for a comfortable, practical and durable portable toilet? Thetford has been developing mobile toilets and toilet fluids for the last forty years. That's why we can say with confidence that we are true specialists. So Thetford also has the solution for you: the Porta Potti – a portable toilet that doesn't have to be connected to a drainage or water system.

WIDE APPLICATION

Because the toilets are compact, lightweight and easy to use, the Porta Potti is often used in caravans, motorhomes, boats, folding trailers and even in summer houses. But these mobile toilets also come in handy during renovations in the house or just as a second toilet. The Porta Potti is simple to transport and really can be placed anywhere.

OUTSTANDING QUALITY

We devote much attention to quality. Thereby ensuring that your Thetford Porta Potti toilet will

accompany you, trouble-free, for years to come. Porta Pottis are made of durable high-grade plastic, which, combined with their rounded forms, means they are easy to clean and maintain. Furthermore, the portable toilets have many innovative features that optimise comfort and ease-of-use.

TWO SECTIONS OPTIMISE USE 1 4

The Porta Potti consists of two sections. The upper section is a combined flush water tank and toilet bowl with detachable seat and cover. The lower section is the waste holding tank. These two parts are easy to attach and detach using a lever at the rear of the toilet. In this way, the waste holding tank can be simply and hygienically emptied and cleaned.

EASY TO DOSE 2 3

Dosing the waste holding tank with toilet fluid using the emptying spout is simple. The flush water fluid can be dosed directly via the top of the flush water tank.

INTEGRATED SPOUT 5

All models feature a unique integrated emptying spout, making emptying simple as can be. There is no need to dismantle or clean separate parts.

VENT PLUNGER FOR SPLASH-FREE EMPTYING 5

The waste holding tank has a vent plunger. Pressing this while emptying prevents unpleasant splashing.

LEVEL INDICATOR: MAKING IT CLEAR WHEN TO EMPTY 6

Except for the 145 and 165, all Porta Pottis are equipped with a level indicator. In this way you are warned in good time that the waste holding tank must be emptied.

CHOICE OF FLUSHING SYSTEMS

The different Porta Potti models have a variety of flushing systems:

- a manually operated bellows pump
- a manually operated piston pump, which is light and easy to use, and ensures a strong flush.
- a luxury electric flushing system. The six 1.5V AA batteries are sufficient for 500 to 700 flushes.

So there's something for everyone!
